DEATH OF SAMUEL TUSTIAN

The Cowley community was greatly shocked on Tuesday morning of last week to learn of the death of Samuel Tustian, who passed away at his home in Cowley.

Although the deceased had been in failing health for some time, the end came very suddenly, due to heart trouble.

Mr. Tustian was born in Oxfordshire, England, in the year 1849, coming to Canada in his early manhood. On January the 20th, 1875, he married Florence Amelia at Niagara Falls, Ontario, and in April of the same year the young couple went to Manitoulin Island on the steamer Seymour, the first steamship to land at Kagawong, which place was inhabited by Indians at that time, Mr. and Mrs. Tustian being one of the first white couples to go into that country. Mr. Tustian took up a farm on the shore of Lake Kagawong, where he hewed for himself a home from the great forests of Ontario, and there remained until March, 1915, when the elderly couple came to Cowley to join the three sons, who had been here for some years previous.

Mr. Tustian was of a quiet disposition and was highly respected by all who knew him. He had always been a strong believer in the Christian faith, and besides being an ardent church worker was also superintendent of the Sunday school at Kagawong for some twenty-one years. After coming west, he was also superintendent of the Sunday school at Cowley for a number of years, until he was forced to give up the work on account of failing health.

The funeral took place on Thursday afternoon, April the 28th, from the Cowley United church. Rev. Mr. Griffith delivered a very impressive sermon to a large congregation. The remains were followed to the Cowley cemetery by a large number of relatives and friends, the service at the grave being in charge of Cowley Lodge No. 20, I.O.O.F., which organization paid their last respects to their departed brother by the beautiful ritual of their order.

Besides a large number of friends, he leaves to mourn his loss, a widow, five sons and one daughter: Mrs. R. J. Lloyd, of Kagawong; George, of Kagawong; William and Fred, of Cowley; Leslie, of Bowden, and Edwin, of Purple Springs.

The floral offerings were as follows:

Wreaths—The Family, Mr. and Mrs. R. Welsh; Cowley I.O.O.F., three links.

Sprays—Mr. and Mrs. Cecil Elton, Mr. and Mrs. C. J. Bundy, H. Swart, Mr. and Mrs. George Ritson, Cowley Sunday School, Mr. and Mrs. George Porter, Mr. and Mrs. R. Littleton, Dr. and Mrs. Donald, Cowley Ladies' Aid, Mr. and Mrs. H. C. Morrison, Mrs. C. L. Easterbrook, Mr. and Mrs. James Bennett, Mr. and Mrs. Grant Smith, Mr. and Mrs. E. Cowan and family, Mr. and Mrs. A. Brockwell and family, Mr. and Mrs. A. G. Swart, Mr. and Mrs. T. J. Cooper, Mr. J. Wilson, Mr. and Mrs. James Leigh, Mr. and Mrs. James Smythe, Mr. and Mrs. J. Graham and Mr. and Mrs. J. R. Irwin.

Mr. and Mrs. Tustian celebrated their golden wedding on January 25, 1925.

The council considered the appeal of the local Dominion Day-Confederation Celebration committee for assistance towards their funds. The council voted \$50.

Council also decided to purchase the fire siren, which has been on trial for two or three weeks and was found satisfactory. One alarm box has been installed near the entrance to the town office. Two or three others will be purchased, one to be located at the Crow's Nest Pass Motors garage, another at or near the Comopeltan hotel and possibly a third in the Pelletier addition of the town.

With practically a complete equipment now for fire alarms and fire fighting, the secretary was instructed to write the Fire Underwriters Association, asking for reduction in insurance rates.

The regular monthly meeting of the Blairmore Board of School Trustees was held in the secretary's office on Friday night last, with Chairman Chappell, and members McDonald, Beebe, Piskney and Tompkins present.

New Machine Records Telephone Messages

Cylinders Take Half-Hour Conversation, Giving Warning of Time Limit

A new machine records a telephone conversation, then repeats it later when required, in the latest word in office equipment.

It is known as the telegraphophone, and is a cross between a telephone and a dictaphone.

Later the machine can be made to "play" the cylinder recording the conversation just like a gramophone.

Other advantages claimed for the machine are:—

It serves as a dictaphone with a microphone instead of a mouthpiece; and

In the event of a conversation being disputed it can relay the original conversation through the phone to the disputing party, even though he be hundreds of miles away.

It can also be used in connection with a wireless receiver to record telegraphic and telephonic messages, even Transatlantic ones.

If set for any hour of the day, it will record automatically any message it picks up, stopping and starting as words or code sign are heard.

This conjures up the picture of the owner of a telegraphophone going to bed, leaving his machine to take down a verbal message at, say, 2 a.m. from a business man in New York, in the morning the owner turns on the "gramophone" attachment and hears the message that came over while he was asleep.

Each cylinder takes an hour's conversation, and the machine gives ample warning when the time limit is nearly up. If the talk is not to be preserved the cylinder can be scrapped and used again, thus saving a scrapling 90 times, giving it a life of 45 hours of conversation.

Searchlight to Pierce Fogs

Inventor of Television Discovers a Dark Ray With Wonderful Possibilities

Belief that the day may not be far distant when every vessel will carry an "invisible searchlight" to pierce fogs and every automobile a fog penetrating dark light is held by J. L. Baird, inventor of television, who has discovered a dark ray which he says will pierce thick fog or smoke.

Baird demonstrated his invention, which he calls "television," at his laboratory in London and will fit a coastwise steamer with apparatus in time for further tests.

After witnessing tests recently, Admiral Mark Kerr said he thought the invention the biggest, thing discovered for sea and air travel in a long time.

The Admiral, with others, saw Baird transmit a doll's features through an artificial fog produced by chemicals so thick that his assistants were choked in it. The dark ray was described by its inventor as a sort of invisible searchlight which has 16 times the penetration power of ordinary light through fog or smoke.

Baird, who is understood to have discovered it as an outgrowth of his experiments with television, claims the new ray will rob fog of its terror and will make smoke-screens in war time useless.

One of the strange features of the ray is that it makes a sound when it encounters a solid object or even a ray of light. Each object produces a different sound, enabling determination of its nature. For instance, Baird said he found that the ray, when thrown on Nelson's monument in Trafalgar Square, produced a different note than when thrown on the dome of a nearby theatre.

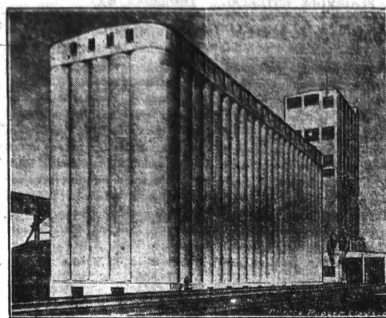

Searching For Lost Vessel

Wooden Sailing Ship Has Been Missing for 146 Years

British shipwreck authorities are helping to trace a wooden sailing vessel last heard of 146 years ago and once commanded by the famous Captain John Paul Jones. Launched 160 years ago at Portsmouth, New Hampshire, the ship was captured by the British during the United States War of Independence and became H.M.S. Halifax. She was later sold to the mercantile service and nothing is known of her since. It is believed the vessel was sold to William Scott, Lord Stowell, who at the time was carrying on business at Newcastle-on-Tyne.

There is now only one survivor, Sir George Foster, of those who were Cabinet ministers under Sir John A. Macdonald. He entered the Government in 1855.

Operations of the Alberta Wheat Pool's Prince Rupert Terminal

The Alberta Wheat Pool has loaded twenty-two ships with wheat from the 1926 crop at Prince Rupert and expects to bring the total up to twenty-four before the crop movement is ended this spring.

The Alberta Pool terminal at Rupert has already handled 5,188,600 bushels and the total will reach 5,788,000 bushels within a few weeks. This is a larger total than was anticipated last fall.

The Prince Rupert house was built and is owned by the Canadian Government, has a capacity of 1,250,000 bushels and is probably the fastest

handling terminal on the coast. It is under lease to the Alberta Pool for a term of two years. Joseph Bennett is superintendent of this elevator.

Through the Pool's extensive operation, the ocean freight differential has disappeared and grain is shipped to Europe from Prince Rupert at the same rate as from Vancouver.

Of the twenty-four ships already loaded or committed, six carried grain to the Orient and eighteen to Europe.

Previous to the Pool leasing the Rupert terminal, no wheat had been shipped from that port.

Smart Little Ones Go Simply Cold Dressing the tiny Miss of two is light is no less an art than providing lovely clothes for her mother or older sister. One of the prettiest and simplest frocks any little girl could have is pictured here, and one which busy mothers can make up in a very short time, for it just has a group of shirtings either side of the front and in the center back. A simple chain stitch of colored silk floss is worked over each row of gathers, lending a bright touch, and holding the fullness firmly in place. Shirtings are again seen on the wrists of the full sleeves and pockets, while the place bloomers make this a most practical dress. No. 1434 is in sizes 2, 4, 6 and 8 years. SUNDAY SCHOOL LESSON

PETER AND THE RISEN LORD

Golden Text: "Blessed be the God and Father of our Lord Jesus Christ, who according to His great mercy brought us again unto a living hope by the resurrection of Jesus Christ from the dead."—1 Peter 1:3.

Lesson: John 20: 1-10; 21: 1-23.

Explanations and Comments

1. Mary Magdalene's Discovery at the Tomb of Christ, John 20: 1, 2.—A stone had been placed over the entrance of the tomb in which the body of the crucified Saviour had been laid (Mark 16: 4, 6, and the stone had been sealed (Matthew 27: 66). The stone was probably a cylindrical one which could be rolled aside by the women, as the base of the opening of the tomb. Early on Sunday morning Mary Magdalene came to the tomb with the others, as the "we" in the next verse indicates. She found the stone removed. At once she hastened to tell Peter and John (John always refers to himself in his Gospel as "the disciple whom Jesus loved"). They "have" taken away the Lord out of the tomb, and we know not where they have laid him.

The Catholic, who cannot find the place in these Easter days to have the stone rolled back, whether it be pride, greed, or pleasure, that keeps him tormented in his own selfishness, is called to see the process of Easter.—Catholic Standard and Times.

Peter and John at the Tomb of Christ, John 20: 3-10.—The two disciples ran to the tomb. John ran first, and looking in reverently and wondering, he saw the Saviour's body had rested, a weathered, light linen cloth in which it had been wrapped. Then, impetuous Peter rushed into the tomb and saw a weathered, light linen cloth, which had enveloped Christ's body were rolled up and the napkin, which had been about his head, was in another place. Leisurely and orderly had been Christ's departure. Had he not carried off his body, the grave clothes would not have been left. Then John also entered the tomb, and the light sufficed him; he believed that Christ was risen. "A heart full of love for Christ requires but little proof to find in him a living Lord. The apostle of love was the first person to believe in the risen Christ, and he it was who afterwards recorded that beatitude which fell from the lips of his living Lord, a beatitude the blessedness of which he was the first to know and in which we all now share, 'Blessed are they that have not seen, and yet have believed.'"—C. R. Erdman.

Make Mendicancy An Art

Beggars in France All Carry Manual of Instructions

Mendicancy is an art in France, and Gallie beggars have a "Manual for the Use of Beggars" to instruct them in the art.

The book, which includes a "sucker list" of good prospects, emerges from the pocket of a beggar when a Paris Judge admired his knowledge of humanity.

"Why, it's an art," exclaimed the beggar, drawing forth the textbook in explanation.

Most of the chapters are devoted to technical instruction, such as how to operate at baptisms, marriages, funerals and the methods of attracting sympathetic attention.

There is instruction in how to seem blind, simulation of certain ailments, feigning of suicide attempts and the concealment of legs or arms for displacement by false ones.

Had Lengthy Journey

Cabbage Grown in Texas Purchased at Grand Falls, Newfoundland

How far does a head of cabbage travel? A man in the city of San Benito, Texas, employed at a vegetable shipping house, was curious, and during the season he picked out an exceptionally large head of the vegetable and wrote a note on it asking the recipient to inform him where it finally landed.

Recently he received a reply to his cabbage epistle. It came from a boy at Grand Falls, Newfoundland, clear across the continent.

There is nothing equal to it.

London Has Mystery Clock

Secret of Mechanism Will be Revealed Only to Purchaser

A clock with no sign of any mechanism is the latest novelty in London. It cost \$200 to make. Although the crystal is transparent, no one except the maker knows how it goes.

The face of the clock is embedded in a slab of crystal 5 in. in diameter, and the hands, made of platinum and diamond, revolve on a thin metal pinion. There is, however, no apparent connection between the hands and the framework.

Although rich enamel, gold, and jewels are used to decorate the framework, it is the craftsmanship that accounts for its high price, and the secret of the mechanism will be revealed only to the purchaser.

Record Building Activity

Indications are that building in Canada will be more active than it has been for several years. For the first three months of the year there is proposed construction amounting to \$208,132,000, which is actually 44 per cent. higher than the total in the corresponding period of 1926. The lead is taken by residential contracts, which is a natural result of the upward trend of business that has been noted for many months past.

CONGREGATIONAL MEETING

The annual congregational meeting of the Bellevue United church was held on Thursday evening last.

The choir was occupied by the pastor, Rev. J. W. Oliver, and a large congregation was present.

Reports were read by representatives of the various organizations connected with the church, all showing satisfactory progress.

The financial report, presented by Mr. Watts Goodwin, was very gratifying. It showed a better financial standing than any previous year in the history of the church.

The many friends of Mr. and Mrs. Oliver learn with regret that they will soon be leaving Bellevue. Mr. Oliver has been transferred from the Alberta conference to Hamilton conference, and will take charge of the work in Colpoys Bay, Ontario. Mr. Evan Beachman, of Colpoys Bay, will come to Bellevue.

At the close of a very interesting business meeting, refreshments were served by the ladies. Musical selections were supplied during the evening by the Orthophonic, kindly loaned by Mr. J. A. Barbour. A very pleasant evening was spent.

An American exchange remarks: "The Reverend Dr. Stanton, forceful fundamentalist, is suing the head of the American Association for the Advancement of Atheism. Of all folly, Atheism is the greatest. If a passenger on shipboard answers 'no body' to the question, 'who runs this ship?' you charitably conclude that he is feeble-minded. And if there were truth in Atheism, which is inconceivable, it would be a hideous truth, depriving humanity of its greatest comfort. This earth is a canoe-half express, going around the sun on a 558,000,000-mile journey every year, at a speed exceeding 63,000 miles an hour, warmed by a star nearly 100,000,000 miles away, surrounded by an ocean of ether at absolute zero. Whoever thinks such a scheme as that has no engineer should be pitied, not sued."

Mr. Bowling, who for some time has been manager of the Natal Co-operative Store at Natal, has resigned that position to go back as a drummer for the Scott Fruit Co. His territory will be confined to the Kootenays. Mr. Bowling is being succeeded by Mr. Conn, formerly of Conn's Cash Grocery, Fincher Creek, who took over his new duties this week.

It is not often that crop records for a calendar year can be smashed in April. Claresholm can boast this unique distinction, actually in less than four months. In searching the possible haunts for probable news items, The Local Press scribe wandered into the Claresholm hospital. You perhaps can recall that six girl babies came there within one week recently. But! The hospital records boast more babies to date in 1927 than for the whole twelve months of 1926. Come now, you envious towns, show your stuff.—Claresholm Local Press.

Half a million dollars was spent on the freight-rate probe.

Mr. and Mrs. T. Aaron and Mr. and Mrs. D. Sorrentino motored to town from Cardston on Sunday morning. She's Brewery, Winnipeg, was found guilty of selling liquor illegally and was fined \$3000 and costs.

THE PASS FIFTEEN YEARS AGO

(The Blaimore Enterprise, 1918)
 March 28.—Fire on Monday night destroyed the Cosmopolitan hotel, Kall Brothers' store, Ben McDougall's jewelry store and A. McLeod's real estate office, the total damage being estimated at \$50,000. The fire was the biggest in the town's history. Fire originated in the Kall store, a frame building, and quickly spread, wafted by a strong east wind. The Ede-building, occupied by T. Ede and the Royal Bank of Canada, was saved. The Blaimore hotel building was badly scorched. Fire brigades from Coleman, Frank and Bellevue were quickly on the scene to assist the local brigade. Federico Calabrese, occupying an attic room in the hotel, was burned to death, part of his body being found in the ruins. The Cosmopolitan hotel had been purchased by A. A. Sparks from Harry Howard about eight months previous.

H. D. McMillan, of the Cowley hotel, morticed to Blaimore on Friday.

The F. M. Thompson Co. will open today as successors to Mar On, carrying general stocks of merchandise. Their opening announcement is contained in this issue of The Enterprise.

Mrs. Adolphine Priot committed suicide by drowning in the river near Frank on Saturday morning.

April 4th.—The following jury enquired into the cause of the death of Federico Calabrese: H. E. Lyon, chairman; H. G. Bigelow, L. Dutil, C. E. Hiscocks, D. A. Sinclair, W. J. Bartlett and John Gaskill Smith.

Chicago was once a mud flat along the lake, with a fort where white people might hide from Indians. Later it was a pile of ashes. At present it is the most progressive of the four biggest cities in the United States, with the possible exception of Detroit. It has over a thousand millionaires and about 'teen thousand criminals. Chicago is the only city in the world that harbors and prizes criminals.

David Oliver has taken over the draying business of Ernest Hinds and started in on the new job on Monday. Mr. Hinds and family leave here shortly to return to the old home in the States.

Europe Inspired It—Dietrich Designed It Studebaker Built It—Paris Approves It Now All Blaimore Can See It

At the 26th International Motor Exhibition at the Grand Palais in Paris, Europe saw the Erskine Six for the first time. Over night it was acclaimed the hit of the Paris Show!

The press called it the "Clou du Salon!" The man in the street and the man of affairs—designers of cars and designers of the Paris mode—everybody declared the Erskine Six to be the outstanding triumph of the exhibition—excelling Europe in its own type of car. The Parisian triumph was repeated at the Olympia Show in London.

Priced Low

People over there want modishness and insist upon upkeep economy. Motorists over here are welcoming both as a new order in car ownership. The Erskine Six was built for both markets, for it sells for less than \$1300 at the Walkerville, Ontario, factory.

But don't look for any signs of economy in its appearance—because Dietrich designed it!

And don't be afraid that economy has impaired the quality—because Studebaker built it!

The Erskine Six is a new-comer as a car, but it's built and backed by an old-timer in the industry and has been perfected by extreme road tests on Studebaker's million dollar proving ground!

It is only 5 feet 7½ inches in height—yet it affords ample clearance for Madame's chapeau. Wherever you look at this low-swung, wide-windowed, full-vision steel body, you will find visible evidence of the creative genius which is Dietrich!

Outside, the close-hauled beauty of the Paris mode—and inside, the relaxation and comforts of home!

And what a car to get about in!

Easy to Handle

Nimble enough to turn in an 18-foot radius—powerful enough to take an 11% grade without shifting gears—fast enough to skim over the highway at 60 miles per hour—and smart enough to be an ornament as well as an automobile.

And for service, you get the sponsorship of Studebaker.

The Little Aristocrat

Here, at last, is European beauty and economy, plus Canadian luxury and efficiency—an entente cordiale of the engineering genius of two continents—overtime service at half-time cost!—twice the mileage for half the money!—small car benefits with big car responsibilities!

Presented to Canada as a new mode in cars. Acclaimed by Paris as the car of the mode!

The talk of the old world and the next motor topic of the new!

If you are interested in small car cost for big car conduct, and big car mileage for small car money, you will certainly make it a point to see Canada's most radical development and improvement in small car construction—The Erskine Six, "The Little Aristocrat."

PROSPERITY OF THE WEST IS NOW ON A SOLID BASIS

Montreal, N.S. — A picture of Western Canada recently appearing in the *Montreal Star* has been taken for members of the Montreal branch of the Canadian Credit Men's Association by W. J. Bolton, Edmonton, the national president of the organization, at their monthly luncheon today.

Bolton, and other artificial trade stimulants had been left behind, Mr. Bolton declared. He described how mixed farming was playing an important part in the development and prosperity of the prairie, and said that in his judgment just one more good crop is needed to put this country "over the top."

He was confident this would be a good year for the West and that eastern business interests at the end of the year would see some reflection of this in increased orders for the goods they had to offer for sale in Western Canada.

Declares Border Law Menace to Friendship

Toronto Banker Urges Compromise in U.S. Passport Regulations for Canadian Commuters

Buffalo, N.Y. — Members of the Buffalo Kiwanis Club attending a United States Canada luncheon were warned by George Wilson, Toronto banker and civic leader, that "the new passport requirements for Canadians working in this country must be compromised in some manner in the present unfettered and extremely cordial relations between the two countries are to be uninterrupted."

"The two countries this year are celebrating 111th anniversary of the Rush-Bagot treaty which practically eliminated the activity of armed forces along the border," said Mr. Wilson, "and year by year the relations between the people have become more friendly. Yet, in the midst of all this and at a time when thousands of Canadians and almost as many number of Americans commute daily from one country to the other, furnishing excellent labor for industries, the United States has announced its new passport regulations."

"I sincerely hope that some compromise will be reached. Canada undoubtedly would retaliate if the new regulations were to stand."

Four Armies of Hankow Nationalists Ready for Attack Says Report

Canton, China.—The Hankow section of the Nationalists (Cantonese) is reported to be preparing for a general advance upon Canton with four armies.

The armies, it is said, will move through Hunan province, attacking Canton by way of the east and north rivers and utilizing the Red forces distributed in the districts on route. Canton, important source of revenue and site of a large arsenal recently declared its independence of both the Hankow and Nanjing Nationalist regimes. Later, however, the moderates rounded up the Reds after which the city nominally adhered to the Nanjing section.

The statue itself is the work of Emile Brunet, of Montreal.

May Propose Abolition Of Large Submarines

In this connection, experts have pointed out the likelihood of the United States insisting on the use of these craft to maintain communications with distant possessions.

Another workman standing thirty yards distant was struck by a shell fragment and died in hospital.

Ottawa.—Ten thousand copies of a pamphlet containing general suggestions for the guidance of committees in charge of local celebrations have been sent to every organized municipality in Canada, to all members of Parliament and members of provincial legislatures, by the national committee for Jubilee celebration.

The pamphlet contains suggestions as to decorations, ceremonies and time for the events, with proposals regarding parades, school children, tableaux, veterans and militia, new comers, old settlers, Indians, decorations of monuments etc.

PAY TRIBUTE TO BRITAIN FOR AID GIVEN IN CHINA

Vancouver.—Mati advices from Shanghai give details of the loyal menials sent the British Government by the non-British residents of the big Oriental city as a tribute to the prompt action of Britain in sending troops to protect the settlement.

The arrival of the vote of thanks was as follows:

"We, the undersigned, non-British residents of Shanghai, wish to express our appreciation to His British Majesty's Government for the prompt and adequate measures taken for the defense of Shanghai. Though we realize that, quite naturally, the despatch of troops was primarily for the defense of its own nationals, our foreigners residing here, of whatever nationality, have benefited equally. If the British troops had not arrived when they did, we should now all be in an extremely uncomfortable and dangerous position. If we had not actually been forced to leave the city, it is certain that the women and children would have had to be evacuated, and the settlement would probably have shared the fate of Hankow and Kichang.

"The opinion is heard freely expressed on all sides that Great Britain, by the courageous stand she has taken in this crisis, has again given the lead to the whole civilized world."

"Amplifying the above were the words of the last few days have brought home forcibly to all of us the immense value of the timely and adequate steps taken by the British Government for the protection of Shanghai. The mere fact of the arrival of the British forces has prevented an earlier outbreak of terrorism in the settlement itself."

"It has, for some time, been clear to most of us that but for the British troops we would not have been here today."

"Of whatever nationality or creed, we must admit that when others stood aloof, the British Government acted, in spite of all obstacles. We know of the political struggles going on in nearly every country in the world today. We know that the British Government is daily harassed and criticized by forces at work to undermine and to destroy. These forces are at work everywhere, here and in our own respective countries."

"It is seldom that most of us out here find an opportunity of doing a good deed, but here is an excellent chance of adding our mite to a big cause; to silence, if but for a brief spell, the stupid braying of ignorance, cunningly employed by dangerous forces."

"It is interesting to note that there were 2,350 signatures of members of 32 different nationalities."

To Be Tried As Spy

London.—Sitting at Old Bailey, the grand jury returned a true bill against Lieut. Commander Colin Meyers, retired British naval officer, who was arrested in March for alleged illegal possession of submarine plans. Commander Meyers will be tried on a charge of obtaining "certain plans, sketches, documents and information calculated to be useful to an enemy."

Have Not Prepared Draft

FIX RAIL RATES THAT WILL HELP CANADIAN TRADE

Ottawa.—The order-in-council under which the Board of Railway Commissioners are conducting an inquiry into freight rates required the commission to fix just and reasonable rates that would encourage and develop Canadian trade.

However, A. Fraser, K.C., counsel for the Canadian National Railway, insisted this did not mean a momentary suggestion that the present rates were unjust or unreasonable when they received the approval of the board.

"Conditions were constantly changing," Mr. Fraser said, and what was fair and just at some period in the past might need adjusting now. This was what the board was now called upon to consider.

Some discussion arose between Deputy Chief Commissioner Vien and counsel as to exactly what were the limitations of the powers of the Governor-General in council to issue instructions to the board as to the lines upon which they should proceed in the adjustment of rates. It was agreed that the commissioners were the sole judges of what would be fair and just rates, subject to appeal to the Governor-General in council and His Excellency's powers of review were wide, almost to the degree of being arbitrary.

It was further agreed that an order-in-council might be set forth in the future, establishing for the guidance of the Railway Board, but if those principles could be shown to be in conflict with the provisions of the Railway Act, the order-in-council would have to go.

CANADA AND U.S. CONFER ON NEW BORDER RULING

Washington.—Frank B. Kellogg, secretary of state, has taken up with the Labor Department the request of the Canadian government for a joint conference on immigration regulations affecting the movement of Canadian citizens across the border to work in the United States close to the international line.

Acceptance of the Canadian suggestion for a joint conference is foreboded, but the formal communication may be delayed a few days to await preliminary exchange of views and formulation of United States policy between the state and labor departments.

The regulations issued by the Labor Department playing some restrictions upon Canadians who cross daily, back and forth into the United States where they are employed, was made effective a month after their promulgation a week ago.

Fighting War by Radio

League of Nations May Have Powerful Influence at Geneva

Geneva.—Radio will be used by the League of Nations in its fight against war.

It is hoped that eventually the League will have its own powerful radio station here. Telemasters are to be asked whether it will be possible for a refractory government to "jam" the wave lengths in order to prevent the League's broadcasting reaching its subjects.

The League Council already has voted to use aeroplanes in anti-war demonstrations, possibly to drop League manifestos for citizens of rebellious states. Building of a League aerodrome here has been suggested.

Stole Safe From Toronto Store

Amount Secured by Thieves Only About Fifty Dollars

Toronto.—Entering Arnold's meat market, Dundas avenue, at an early hour today, thieves dragged a small safe weighing about 200 pounds out to the street, and, placing it into a waiting motor car, drove off. People living above the store heard the commotion and telephoned police, who found the doors of the store wide open but no trace of the robbers. The amount of money in the safe will not exceed \$50.

Will Not Repeat Invitation

Geneva.—The League of Nations definitely decided, despite the recent settlement of a long standing controversy between Switzerland and Russia, not to issue a second invitation to Moscow to participate in the forthcoming economic conference. The first invitation was declined because the conference was to be held on Swiss soil.

Will Take Trip Across Canada

Montreal.—Miss Hortense Carter, 75-year-old surviving daughter of Sir George Etienne Cartier, one of the Fathers of Confederation, has accepted an invitation from E. W. Beatty to take a trip across Canada next July in connection with the diamond jubilee celebration. Miss Carter resides at Cannes, France.

Edmonton.—D. A. McCannell, editor of the Alberta Farm Journal, has been appointed publicity commissioner for the Alberta Government, in succession to Colin G. Groff, recently removed to Montreal. He will take up the duties of the office in about two weeks' time.

Ramsay MacDonald Improving

Philadelphia.—Right Hon. J. Ramsay MacDonald, former British Labor Premier, who is in Jefferson hospital from a sore throat, was reported by a physician to be "improving steadily." No indication was given as to when Mr. MacDonald would leave the hospital.

Good Reception in North

Bernard Harbo, N.W. (C) (A) (A) Harbo.—Plans have been blessed with phenomenal reception during the winter and still are able to get American as well as European stations during the daylight loud speaker volume.

Entitled to Retire

Regina.—Approximately 60 members of the Saskatchewan civil service have received notices that they will be entitled to retirement under the Superannuation Act on November 1, 1927, at age 65. These are those who have reached the age of 65 years by May 1.
